

Source code: <https://github.com/artak10t/BookUp>

What we used: Java Spring, sqlite-jdbc, Bootstrap.

Design Pattern: We used MVC design pattern, you can find model inside `/src/main/java/com/BaldFrogs/BookUp/Models` and Controller `/src/main/java/com/BaldFrogs/BookUp/Controllers`. View can be found inside `/src/main/resources`.

Known issues: While registration and login is implemented, we had a hard time with implementing sessions for users. Thus we don't have sessions, everything else works perfectly.

Documentation: <https://artak10t.github.io/BookUp/>
